PivaPunch

PivaPunch

Punching Center for Coils

Our punching center is available for coils as well as for coils & blanks. We'll equip it according to your specific needs, whether you're producing a variety of parts in small batches or families of parts in big series.

PivaPunch is a programmable punching center for coil material. Our basic PivaPunch is available for versatile jobs, and our customized versions are equipped according to your specific needs to help you take a tiger leap in productivity.

PivaPunch is more efficient than other sheet metal punching methods because it works straight from coil fully automatically, producing punched blanks stacked the way you need them.

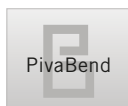

It's more flexible because it uses an advanced and freely programmable CNC coil punch system.

Versatile solutions

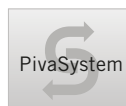

Industries that use PivaPunch include office furniture, heating and ventilation, air conditioning, domestic appliances, shelving, lighting fixtures, electronics, vehicle, accessories, telecommunications, subcontracting, enclosures.
