

MOBILEPRO

Self-cleaning fume extractor
for the professional welder

DO YOU REMOVE WELDING FUMES EFFECTIVELY?

We do. Removing welding fumes in a welding workshop, especially at the source, contributes significantly to a better work environment. Source extraction remains the most effective method of capturing and removing welding fumes directly from the breathing zone of the welder.

We have 45 years of experience. Plymovent has been specialising in the extraction and filtration of welding fumes. We offer high-quality solutions that keep the background concentration of welding fumes within the legal limits, in accordance with international guidelines.

All our extraction and filtration products are designed primarily to remove and control welding fumes in the metal-working industry to protect the welders and people working nearby. The result: better work performance, increased productivity and less absence due to illness.

A TOTAL SOLUTION

The MobilePro is a welding fume extractor for professional welders that need a flexible solution. Plymovent's mobile filter units are designed to remove welding fumes on-site in confined spaces and spaces that are difficult to reach by fixed welding fume extraction systems, for example in the middle of a workshop or reversely, in an outer corner of a facility. This stable mobile unit has an ergonomic handgrip and has four wheels, of which two swivel casters, to facilitate easy movement. The MobilePro is suitable for many welding applications such as MIG, MAG, TIG, GMAW, FCAW and stick electrode welding. Naturally Plymovent's extraction arms, the 3 and 4 meter KUA and Economy Arm, can be attached to the MobilePro to reach the required length.

WORKING RANGE

FEATURES MOBILEPRO

SILENTFLOW™ DUCT FREE SILENCER

The MobilePro has an integrated fan placed in a SilentFlow™ sound absorbing box. SilentFlow™ reduces both the mechanical and airflow noise of the fan by using an innovative air flow path, acoustic panels and a specially designed outlet.

RAM-AIR™ LOW OPERATIONAL COSTS

The MobilePro features a Ram-Air™ pulse amplifier, a powerful part of the back pulse cleaning system, that enhances the cleaning efficiency. A Ram-Air™ pulse amplifier is placed in the filter cartridge and disperses the pulse energy directly to the filter medium. The results are significant: cleaner filters; lower pressure drop, less compressed air and energy consumption. Ram-Air™ means low operational costs.

BICO FILTER CARTRIDGES LAST LONGER

Filter life is not only determined by cleaning efficiency but more often by the strength of the bonding between the fibers in the media. Most cartridges fail when the bonding breaks. This causes an immediate pressure drop and a decrease in airflow, the result – costly filter cartridge replacements. Plymovent's BiCo polyester filter cartridges are based upon the latest state of the art *Bi-Component Technology*. This technology, making use of fibers, with a difference in melting point between core and surface, guarantees consistent quality and strength which produces a much longer cartridge life. Plymovent cartridges are 100% polyester and therefore also washable.

TECHNICAL SPECIFICATIONS

Filter surface area*	20 m ² (215 ft ²)	
Extraction capacity	Max. 1200 m ³ /h (700 CFM)	
Filter material*	100% BiCo polyester	
Cartridge	Washable	
Motor*	115V/1ph/60Hz (Canada) 230V/1ph/50Hz 400V/3ph/50Hz + N	
Arm combinations	KUA-2/S	KUA-3/S
	EA-3/S	EA-4/S
Option	LL-5.5/24-160 manual on/off switch, incl. LED working light (arm 359° rotatable)	
Noise level	72 dB(A) according to ISO 3746	
Weight	169 kg (373 lbs.) (excl. arm)	

*TECHNICAL SPECIFICATIONS WITH IFA W3 CERTIFICATION/ MERV 16 RATED FILTER

Filter surface area	10m ²
Filter material	BiCo polyester carrier with PTFE membrane
Motor	400V/3ph/50Hz + N

W3 compliant in accordance with EN-ISO 15012-1:2013

DIMENSIONS

	mm
A	646
B	1024
C	1150

PLYMOVENT OFFERS COMPLETE SOLUTIONS FOR AIR CLEANING

Plymovent has been gaining experience for 45 years in the field of air cleaning. We have extensive knowledge of the extraction and filtration of welding fumes and oil mist in metalworking industries. Additionally, we are also specialised in the removal of vehicle exhaust fumes.

**Plymovent cares about the air you breathe.
We offer products, systems and services which ensure clean air at work, anywhere in the world.**

We respect the environment and we deliver high-quality products. Our expertise gained over many years and our genuine commitment to customer requirements enable us to provide precisely the solutions you need.
