### WOLF 2000. For specific tasks

**THE WOLF 2000** machine is designed for lifting concrete elements with a maximum weight of 2000 kg. The folded element is inserted into the right position without the need to move or pull the transport belts. It is powered by an internal combustion engine with an electric start-up motor.

#### Main advantages of WOLF 2000:

- Ability to lift elements with a maximum weight of 2t,
- Robust structure and compact dimensions,
- High-performance pump: 60 m<sup>3</sup>/h,
- Radio remote controller,
- Fast configuration (e.g. the use of various suction cups and the adaptation of the machine to the forklift, the use of a beam to hang several suction cups),
- Audible signal and indicators,
- A clogged filter and low fuel indicator (petrol version),
- Safety belt straps.

#### Benefits from using WOLF 2000:

- Instant suspension of transported elements (1 second for material suction),
- Precise laying of concrete elements without any joints (all the side edges remain separate),
- Multitasking capabilities – assembly of various concrete elements, e.g. those which are sandblasted, flamed, have a high level of permeability with microchannels, as well as those with a porous surface,
- Can be operated even in confined space,
- Non-invasive assembly and the ability to move elements that do not have their own suspension,
- The highest safety standard compliant with EN 13155.

## Base WOLF 2000

## Accessories

Adaptation for the WOLF2000 forks

799 €

Beam for WOLF2000, 1.8 meters in length

595 €

Suction pads to 1700 kg (100x70)

1 003 €

Beam for WOLF2000, 1.5 meters in length

496 €

Beam for WOLF2000, 2.1 meters in length

694 €

Suction pads to 1200 kg (100x50)

548 €

Suction pads to 700 kg (80x40)

498 €

Suction pads to 410 kg (80x25)

291 €

Suction pads to 520 kg (100x25)

368 €

Suction pads to 300 kg (50x30)

291 €

Suction pads to 130 kg (60x15)

265 €
