

Smart refuelling. Refuelling with CEMO.

Mobile and stationary tank systems from specialists for professionals.

Modern, innovative and sustainable refuelling.

Professional products.

The CEMO Group, with over 275 employees, is one of Europe's leading manufacturers of professional tank and container systems.

Whether for diesel, petrol, AdBlue®, lubricants or engine oil: CEMO has the right tank system for every medium. Our solutions are made in Germany and impress customers with their high quality, tested materials and accessories that make them easy to use.

High standards for professionals.

CEMO impressed the world with its innovative qualities and was awarded the TOP 100 seal of approval in 2023. We are pioneers in the field of modern transport and storage container technology and the market leader for own-use filling stations for diesel, petrol and AdBlue® – with our own environmental protection range.

We will find a suitable solution – even for individual wishes and requirements.

Efficient refuelling.

Always mobile without having to detour to a filling station: CEMO solutions for on-site or off-site refuelling guarantee safety, ensure shorter commutes and save money.

No more forced refuelling stops. CEMO tank solutions ensure that vehicles can be refuelled at any time of the day or night. With petrol, diesel, AdBlue® or as a 2-in-1 solution. Stationary or mobile.

A suitable tank system makes you independent. CEMO provides efficient systems – from double-walled steel tanks to manoeuvrable trolleys. The focus is always on safety.

The tanks are either made of extremely durable and robust steel or lightweight, resistant PE in a variety of shapes. The new hybrid tanks made of steel with an inner tank made of PE combine the advantages of both materials.

All versions make your business operations safer and more efficient – because with the CEMO solutions, not a drop is spilled.

Customised refuelling

The most important questions

1 Which medium does it relate to?

-  Diesel
-  AdBlue®
-  Petrol
-  Lubricants

2 What features are important in a tank system?

- ✓ Flexible systems
- ✓ Capacity for every application
- ✓ Easy to transport
- ✓ Easy to use

4 Tank system made of steel, PE or the new hybrid tank?
(see page 7)

Steel

- ✓ Highly durable
- ✓ Extremely robust
- ✓ High resilience

Polyethylene (PE)

- ✓ High chemical resistance
- ✓ Lightweight
- ✓ Variety of shapes

3 What is the intended use of the tank system?

- ✓ Stationary solutions
- ✓ Mobile solutions with ADR certification
- ✓ Mobile solutions permitted in accordance with ADR

Stationary refuelling

Robust, stationary individual tanks up to 5,000 litres and complete systems up to 15,000 litres made of PE as well as steel tanks holding up to 30,000 litres.

CUBE

No-compromise complete systems for diesel, AdBlue® and lubricants. Very robust.

UNI

HDPE tanks with an galvanised sheet steel bund providing compact systems for diesel or lubricants.

Mobile refuelling

Fast and simple refuelling – on construction sites, off the beaten track or in the field.
CEMO's mobile tank systems are available in a multitude of versions.

EASY mobil

The practical solution for refuelling on-site – available for diesel, petrol or AdBlue®. Compact and lightweight design. Also available as a 2-in-1 version for diesel and AdBlue®.

PRO mobil hybrid

NEW

Mobile tanks made of steel with inner tank made of PE: More lightweight, more durable, longer ADR certification, PE inner tank can be replaced. Also available as a 2-in-1 version for diesel and AdBlue®.

Trolley

Easy to transport, no more spills: mobile trolleys for diesel, petrol, heating oil, lubricants and AdBlue®.

Professional tank systems, well thought-out

Solutions that prevent downtime and save valuable time: CEMO offers you complete systems made of high-quality polyethylene or steel tanks with integrated accessories.

CEMO – Your partner for safe storage

Do you have high standards? So do we!

For CEMO, the protection of people and nature has always been a top priority. This means that all CEMO products meet the latest safety standards. CEMO solutions are geared towards preserving the precious assets that have been entrusted to us for tomorrow's world. Decades of experience enable us to offer you today an extensive product range for safe storage, transport and dispensing.

1960

Erhard Mödinger set up a two-man business in Weinstadt for the production of grape vats and barrels made of glass fibre reinforced plastic (GRP) for viticulture and agriculture

1970

The second Chemo plant (called CEMO today) for the production of heating oil tanks was built on a 42,000 m² site in Schnelldorf (Bavaria)

1990

Development of an environmental protection range for the storage of water-polluting substances (GRP drip trays, used battery containers, pollutant collection stations)

2001

Market launch of the DWT tank – the first double-walled tank made of GRP in sandwich construction

CEMO plus points

Sustainability

Durable and well thought-out: In the development of our products, we take environmental protection as well as legal requirements into account.

Quality

Intelligent design and the highest quality workmanship make our tank systems efficient and economical.

Experience

Products with added value, expert technical advice, extensive training: With CEMO, you get everything from one source.

Our products on the Web

Legislation, materials, products: Handling fuel raises a number of questions. We will be happy to assist you – thus saving you time and money.

You can always find more information on our product range on our web site:

www.cemo-group.com

2013

Development of a new tank generation for diesel, AdBlue® and lubricants: CEMO CUBE

2016

Development of battery-operated mobile tank systems: CEMO Trolley, CEMO DT Mobil Easy

2020

60 years of CEMO – full-range supplier for safe storage

2023

Expansion of the production plant in Schnelldorf including new rotation systems

- + Made in Germany – and with over 60 years experience**
Our products meet the highest quality standards and have been tried and tested in practice. They far exceed the required service life and are tested and approved by independent institutions.
- + Hazardous material management from one source**
Our range of products includes everything you need to ensure safety during transportation and operation of stationary or mobile tank systems for diesel, AdBlue®, petrol and lubricants.
- + Whether they are made of premium PE, conventional steel or hybrid**
Our tank systems score with the highest safety standards and save valuable time in your everyday work.

Do you need a hazardous materials assessment and information about the regulations for storage and transport? Would you like some advice in choosing products or do you want to undergo training?

We will be happy to advise you!

Reliable products – reliable partner.

The best products are products that meet the requirements of the users. We ask about your needs. And, even more importantly, we listen. We talk to you, find out what you want and take your needs into account when developing our products.

From experience, we know which material will meet your requirements when it comes to durability, safety and price-performance. We therefore work together to protect your and our resources.

**Let's talk to each other about
the products of tomorrow.**
