

PIPE ALIGNMENT TROLLEY

PAT 3

SAFETY

Self loading so reduces manual handling of large fittings.
Very little training required.

ACCURACY

Four way levelling system which allows for fine adjustment.

EFFICIENCY

Single operator can set up with ease, reducing labour costs and time. Considerably faster than using a swing beam or gantry.

Patent Pending

NEW

Do you want to save time in your business? PAT 3 can do that and more....

PAT 3 is a new mobile pipe alignment tool which can be used anywhere in the workshop, in the yard or on a laydown area on site

PAT 3 (8/24) is ideal for aligning pipes and fittings 8 to 24 inches in diameter.

WARNING Do not apply braking system while lifting fittings as PAT3 must be allowed to move central over the load when lifting.

TROLLEY DETAILS

Model:	PAT 3 (8/24)
Height:	2800mm / 110"
Weight:	206kg / 453 lbs
Length:	1220mm / 48"
Width:	1220mm / 48"
Lifting Capacity:	400kg / 880lbs
Lifting Mechanism:	Manual chain block

FEATURES

- Heavy duty steel construction
- True vertical lift
- Four way levelling system
- Two wheel breaking system
- Two wheel steer
- Chain block permits pin point control
- Rubber roller bearing wheels

MAINTENANCE

Visual inspection must be carried out daily before use, checking the condition of:

- Wheels
- Braking system
- Chain blocks
- Pins and clips
- Steel ropes

Operators of this equipment must be trained before using.

Note that the design of the Pipe Alignment Trolley may be changed without prior notice.
