

Liftronic® Mobile

The Intelligent Device
for Handling you
can easily move
wherever you need

Advantages

- ✓ One lift assist device available to the most liftruck models on the market
- ✓ Easy and safe to move around
- ✓ Easy interchange of grippers for handling different type of load
- ✓ Easy battery replacement

Safeties

Acoustic alarm

In case of unlocked arm when moving the transpallet, a sensor activates an acoustic alarm.

Arm

In case of rope damage a mechanical safety device prevents the arm from lowering.

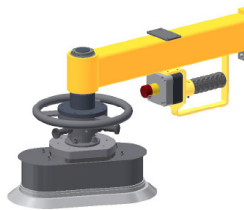

Battery

In case of low batteries, the system allows the last movement and then it stops; the cause of the blockage will be shown on the display.

Switch-off

In case of accidental switch-off, the system allows the last movement and then switches off.

Suitable for different load grippers:

Warning light and acoustic alarm

Control unit

Battery charger connections

Arm locking with sensor

Pallet stop

Very agile

Precise

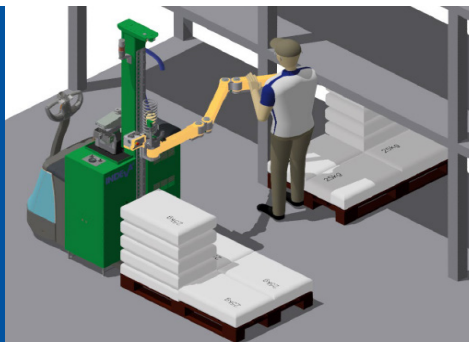

Ergonomic

Zero gravity

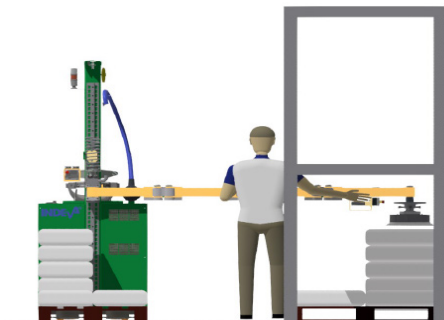

4 JOINTS

3 on the arm + 1 on the gripper coupling.

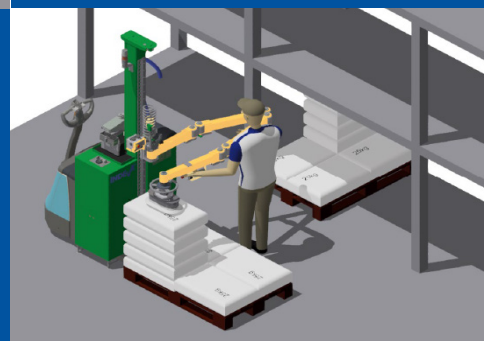

ORIENTATION

On the left or on the right according to the work area side.

SWIVEL JOINT

On the end of arm for continuous rotation around the gripper axis.

Technical data

- Gross load capacity: 60 kg (including gripper)
- Arm length: 2530 mm
- Vertical stroke: 1500 mm- sliding on a column
- Autonomy: about 6 hours for a continuous cycle
- Overall size: 920 x 890 x 2300 mm
- Vacuum gripper: air through the arm, no pipes
