

iSteam iS80

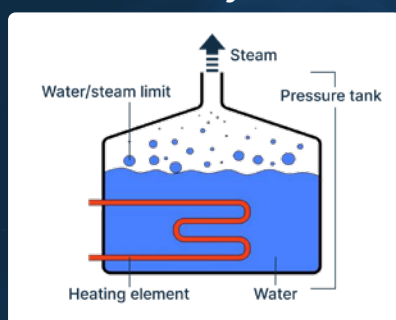

oil-heated

The iS80 dry steam cleaner of the iSteam series is oil-heated and impresses with its strength and performance. The innovative continuous heating system has a significantly higher power level than boiler systems and thus achieves faster steam generation. Due to the ergonomically shaped steam gun and the constant pressure, they are popular for continuous operation. Various functions can be controlled via the integrated remote control on the steam gun: start/stop, cleaning additives on/off and heating on/off.

Steam pressure	10 bar
Steam temperature	170 - 180°C
Steam mass flow	78 - 168 kg/h
Heating capacity	80 kW

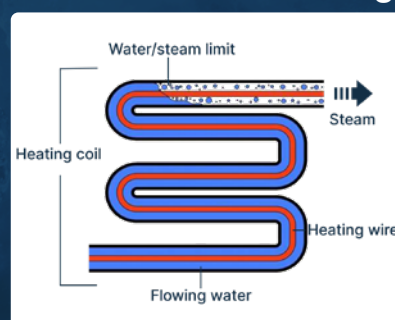

- **Mobile 80 kW heating capacity**
- **Efficient heating oil technology**
- **Stop & Go function**
 - The unit stops immediately when the pistol grip is released
- **Suitable for continuous operation**
 - No pressure loss due to heating coil technology
 - Ergonomically shaped steam gun
- **Continuously adjustable steam quality (dry/wet)**
- **Extensive accessories and safety package**
- **Particularly suitable for:**
 - Degreasing of various materials
 - Machine maintenance
 - Basic cleaning for extreme soiling
 - Fire restoration

Water boiler system

Heating elements in the water cause it to evaporate under pressure. The steam is led upwards to the consumer.

Continuous flow heating system

The water flows through the heating coil and is heated by the heating wire. Before it exits, the water turns into steam and can be pumped on to the consumer.

Standard accessories

Steam hose

10m with handle

Item No. 1506627

Round brush Ø60mm

Nylon

Item No. 1305770

Round brush Ø60mm

Brass

Item No. 1305771

Triangular brush

Nylon

Item No. 1305769

Industrial lance

50cm with round jet nozzle

Item No. 1507000

Industrial lance

50cm with wide jet nozzle

Item No. 1506899

Limescale protection

Liquid softener 1 litre

Item No. 1502499

Optional accessories

Steam hose

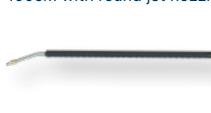

10m extension

Item No. 1508314

Industrial lance

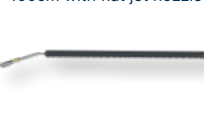

100cm with round jet nozzle

Item No. 1305643

Industrial lance

100cm with flat jet nozzle

Item No. 1305760

Industrial lance

150cm with round jet nozzle

Item No. 1305661

Industrial lance

150cm with flat jet nozzle

Item No. 1305761

Remote control unit

Item No. 1508001

- Connection cable with plug: 5m
- Toggle switch for steam release
- Toggle switch for steam
- Toggle switch for detergent

Remote control unit

Item No. 2103532

- Connection cable with plug: 5m
- Toggle switch for steam release
- Toggle switch for steam

Technical data and equipment

Operating pressure max.	10 bar
Steam mass flow max.	78 - 168 kg/h
Steam temperature max.	170 - 180°C
Electrical connection	1Ph / 230V / 50hz
Heating capacity	80 kW
Water supply	Water Mains connection
Detergent dosage	optional
Oil tank	23 litres
Weight	180 kg
Dimensions LxWxH (mm)	1245×590×910

Technical changes and errors reserved
