

TK No 30 Power Cleat Bender

UNIQUE, PATENTED DESIGN!!!!

The TK No. 30 Power Cleat Bender is a smooth running, quiet machine that will last a career. Fast and efficient, this machine effortlessly prepares the duct for drive cleats. The machine is strong enough to form the reverse, open hem with a swift wiping action. **THIS MEANS LITTLE OR NO SHOCK AND THE MACHINE WILL NOT KILL ITSELF.** The TK No. 30 is the only machine in the market with a proven **FAILSAFE SYSTEM** which protects the machine from damage due to operator error. It's oversized table promotes safety and improved control of already formed duct sections.

US Patent No. US D830,4315 S
