MODULAR WELDING TABLES

Dramatically improve productivity and work quality

The BuildPro's modular design gives you the flexibility to adapt to each new project. You'll work more safely and efficiently, so you can increase both your productivity and the quality of your work.

BuildPro[™] Table Accuracy

• Table flatness: 0.3 mm / 1000 mm

Hole spacing: 50 mm ±0.038

• Hole diameter: 16 mm + :005

• Plate thickness: 16 mm ±0.01

Optional Nitrided (Heat-Treated) Tabletop

The BuildPro™ is available with a protective nitrided tabletop. The nitriding (heat-treating) process is a mechanical polish and post salt bath oxidative treatment. The benefits of this process include weld spatter resistance and corrosion and wear resistance.

Surface hardness: HV 550

Coefficient of friction: 0.37

• Nitriding case depth: 0.01 mm - 0.02 mm

with a continuous tabletop surface.

INSERTA CLAMPS

Place the Inserta Clamps into the 16 mm holes on the BuildPro™ Tabletop for fast and easy clamping. The Inserta Clamps automatically lock into the table holes for quick-set hold down clamping.

Place the Inserta Clamps into any of the holes on the sides or tops of the Riser Blocks (pg. 11), or Economy Stops and Clamping Squares (pg. 11), for clamping in the vertical or horizontal position, at any height.

Clip the optional Top V-Pads (see below) onto the top spindle to clamp round or angled stock. Remove the clamp arm by depressing the spring stop, and slide the Sidekick attachment (see below) onto the clamp bar, followed by the clamp arm, for two point horizontal and vertical clamping force.

TABLE MOUNT C-CLAMPS

Insert the Table Mount C-Clamp into any hole on the tabletop for fast push-down clamping. The Clamp instantly locks into place, ready for use.

Mount on the Right Angle Bracket, Riser Block, or Clamping Squares for push down clamping at an elevated height for taller workpieces. The patented rear crank handle allows clamp pressure adjustment while the clamp is in position. Use the crank handle to pre-set the clamp opening in repetitious clamping applications.

D-STOP BARS

Unique and versatile D-Stop Bars, with spring loaded plungers, are an efficient way to locate and position stock against a stop.

The D-Stop Bars are "distortion tolerant", for welded structures allowing easy part removal. They consist of a rounded end stop, a flat end stop, and long stop edges, and can be locked into position with Ball Lock Bolts, or Socket Head Shoulder Screws (see page 15). Use the round end to locate any round or irregular shaped parts. Full length slots give you numerous mounting positions.

The Anodized Aluminum D-Stop Bars are lightweight and easy to use maneuver. Mount D-Stop Bars using M10 hex head screw. Must be used with Threaded Adaptors, (sold separately) Part Nos. TXT6204 or TXT6304. See page 15.

ECONOMY STOP & CLAMPING SQUARES

Three sided Stops and Clamping Squares feature fully machined square surfaces for a variety of fit-up applications. Insert Table Mount C-Clamps, or Inserta Clamps into any of the CNC machined 16 mm holes for horizontal or vertical clamping at any height. Use the squares to brace tall workpieces. Insert Magnetic Plugs into any of the holes to hold sheet metal in a vertical position. The lower base features a slotted hole for adjustable mounting. Clamping Squares can be stacked for taller applications. Use with M12 Shoulder Screw Part Nos. T931605 - T931612. See page 15.

Use the Channel Block and Rest Button when a flat, continuous support surface is required directly over the 43 mm table slots. Place the 3-hole Channel Block beneath BuildPro™ plates, aligning with plate holes, and mount with Socket Head Shoulder Screws (See page 15). Place the Rest Button in the center hole of the Channel Block to provide a rigid work surface level with the tabletop. The 16 mm shank on the Rest Button slip fits into the Channel Block holes. To elevate a workpiece above the tabletop surface, place multiple Rest Buttons directly into the 16 mm holes on the BuildPro™ Plate.

BALL LOCK BOLTS

An essential component in Modular Fixturing!

Ball Lock Bolts are a time-saving, efficient, and handy method of fastening fixture elements to the BuildPro™ Tabletop, especially in tight spaces, and hard-to-reach areas of the tabletop. The quick-setting Ball Lock Bolts provide accurate locating and clamping at the same time.

Insert the Ball Lock Bolt over the fixturing element to be mounted on the tabletop. Turn the knurled head with your hands, for initial positioning. The Ball Lock Bolt system consists of three locking steel balls in the bolt shank that move outward to lock against the bottom chamfer of the table plate, pulling the fixture components securely downward and tightening them in place.

Once all the Bolts are positioned as required, tighten the socket head screw top of the bolts with a hex wrench. Ball Lock Bolts also release quickly, from the Bolt top, with a turn of your hex wrench. The automatic, and quick-locking feature of the Ball Lock Bolts translates into savings in time and effort.
