

# EffiMat<sup>®</sup> box requirements

The EffiMat<sup>®</sup> handles standard boxes.

- Cheap boxes are the wrong investment!
- The used box in an automation application is essential for a faultless operation!
- Boxes with double bottom are preferred
- Gross capacity per box (including box weight): 25 kg
- Max. 4 different box sizes per tower is recommended
- Only box types with exact same width and length may be used!
- Nothing should stick up over the box edge

version 05.2018
